

**Your Name & Project Title:**

**Based on your understanding of the key drivers affecting your key quality characteristic, what key process variable did you choose to target and why?** (*consider attributable impact to key quality characteristic, feasibility, supporting background data*)

**Describe the intervention/ process change you intend to implement to target this key process variable:**

**How do you intend to measure the impact of your intervention/ process change? How will you measure the process? How will you measure the key quality characteristic?**

**How will you statistically compare your outcome?**

**What sample size will you need? How long do you estimate it will take to reach this sample size?**

**Provide your SMART Aims Statement (*Specific, Measurable, Action-Oriented, Realistic, Timely*):**

**Timeline:**

**Please state your expected timeline from now until your presentation is due (*include pre-implementation data collection, intervention/ design change implementation, post-implementation data collection, and data analysis*)**
